

The Beach Saver Block is a natural and easy solution to beach erosion and rehabilitation. Engineered concrete structures that harness natural wave action to restore the sand to the beach.

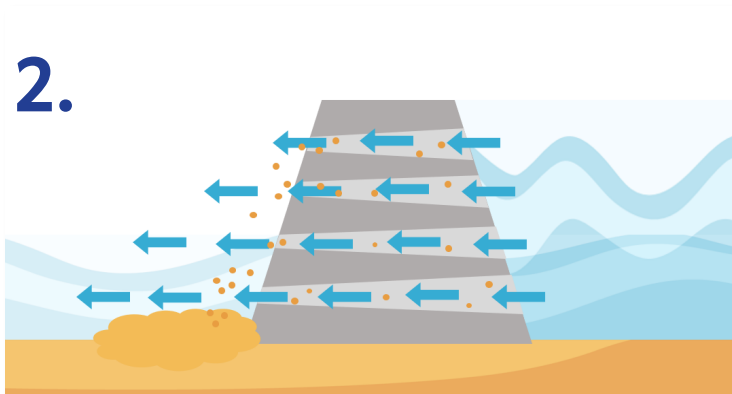

### How it works...

1.

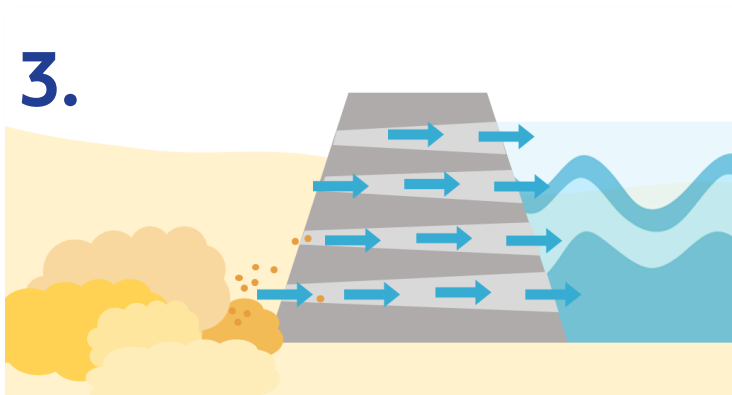

Blocks placed on eroded beach

2.

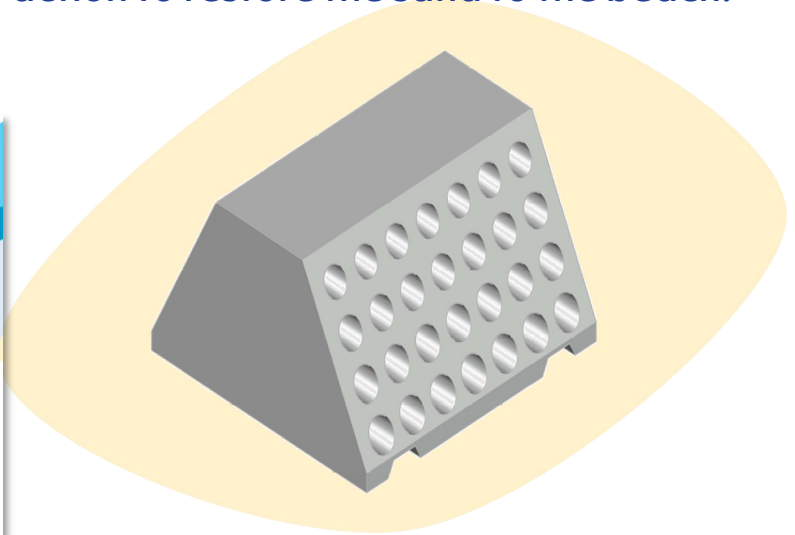

Wave action carrying and depositing sand

3.

Sand is deposited to regenerate the beach

# COASTAL EROSION SOLUTIONS

## Engineered Concrete Protection

Made from concrete, Tetrapods and Dolos are engineered to prevent and minimise erosion along the coastlines and to build seawalls.

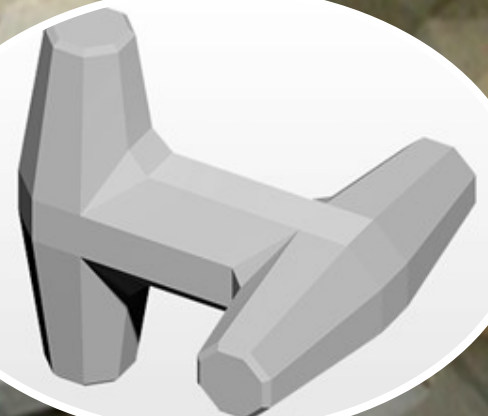

### TETRAPODS

**Tetrapods** available in:  
1.5 ton | 3.0 ton | 5.0 ton

**Dolos** available in:  
500 kg | 1.5 ton  
3.0 ton | 5.0 ton

### DOLOS
